

ALEXIS RIVADENEIRA

Full-stack Technical Leader with 7+ years of experience designing scalable architectures and guiding high-performing, cross-functional teams. Proven track record of spearheading architectural modernization for enterprise clients, optimizing agile delivery workflows, and mentoring engineers to elevate code quality. Adept at balancing robust system design (SOLID, Clean Architecture) with clear stakeholder communication to align technical strategy with business goals.

EXPERIENCE

DEVSU – Senior Software Engineer, Tech Lead

APR 2021 – PRESENT

STACK: React, Next.js, Django, FastAPI, AWS, Tailwind CSS, Flutter, Bitrise

SM ENERGY – LEAD SOFTWARE DEVELOPER

- Led all architectural decisions and technical roadmaps to transition legacy oil and gas data visualization apps into a modern, scalable micro-frontend React platform.
- Designed and implemented a robust, secure integration layer between the frontend and Django/FastAPI microservices, ensuring high performance and data integrity.
- Collaborated directly with stakeholders to evaluate trade-offs, manage technical debt, and ensure the new architecture met strict operational and scalability requirements.

KUSHKI – TECH LEAD

- Led and mentored a cross-functional development team, successfully coordinating sprints, removing technical blockers, and aligning deliverables with product roadmaps.
- Established and enforced rigorous code quality standards, branching strategies, and CI/CD best practices, which significantly improved team velocity and reduced production bugs.
- Facilitated technical refinement sessions, translating complex business requirements into clear, actionable technical specifications for the engineering team.

OTHER KEY PROJECTS

- **BRIGHTLINE:** Rebuilt the core booking module using Next.js and Tailwind CSS, improving core web vitals, UX, and conversion rates.
- **LA FAVORITA:** Designed and developed a Flutter-based shopping assistant application using VIPER architecture and established automated CI/CD pipelines via Bitrise to accelerate release cycles.
- **DEVSU CODE JAM:** Built and deployed a high-traffic event site using Next.js and Prismic CMS on Netlify.

JOBSQUARE SA – *Lead Android Developer*

FEB 2019 – APR 2021

STACK: Android SDK, Java, Kotlin

- Spearheaded the technical vision and development of the EasyFix app from conceptual design through successful App Store launch and subsequent maintenance cycles.
- Mentored junior developers in Android best practices, memory management, and clean UI/UX implementation.
- Designed and integrated real-time push notifications workflows and background services to boost user retention and engagement.

CONT0360 – *Software Developer*

DEC 2018 – JAN 2019

STACK: Django

- Engineered scalable backend services using Django for the PANORA project, ensuring clean code delivery.
- Partnered with Product Managers to align technical development milestones with core business goals.

EDUCATION

ESPOL – *B.Sc. in Computer Science*

APR 2015 – SEP 2020

- Developed apps for social impact, including food order capture and scheduling system for a food bank, carpooling and student aid platforms.
- Vice president of KOKOA, ESPOL's open source community.
- Assistant Professor in Programming Fundamentals (Python).

SKILLS

- **ARCHITECTURE & LEADERSHIP:** System Architecture, Technical Leadership, Mentoring, Agile/SCRUM, SOLID Principles, Atomic Design, Clean Architecture, Design Patterns.
- **BACKEND ENGINEERING:** Python, Django, FastAPI, Java, Kotlin, REST & GraphQL APIs, Database Modeling.
- **FRONTEND & MOBILE:** React, Next.js, TypeScript, JavaScript, Tailwind CSS, Flutter, Android SDK.
- **DEVOPS & CLOUD:** AWS, Bitrise, Github Actions, Git, Docker, Linux, Automation.

LANGUAGES

- **SPANISH:** Native.
- **ENGLISH:** Professional proficiency.
